BY-LAW NO. 6.

A By-Law for causing buildings, yards, and lands to be put in state to guard against fire; to appoint Fire Wardens and a Fire Brigade, and to regulate and control them and the inhabitants of the city in case of fire and danger of fire, and for pulling down and demolishing adjacent houses or other erections to prevent the spreading of fire.

WHEREAS it is expedient to make provisions for the prevention and spread of fire within the city limits, therefore the Municipal Council of the City of Vancouver, in Council assembled, enacts as follows:

1. From and after the passing of this By-Law it shall be the duty of all real property owners, tenants, or occupants in that portion of the City of Vancouver bounded as follows, that is to say:—Commencing at the northern limit of Burrard Street, thence following said street to the intersection of Georgia Street produced to False Creek; thence along Georgia Street and Georgia Street produced to False Creek; thence following the northerly shore of False Creek to the eastern boundary of the eighty-five-acre tract; thence northerly along the eastern boundary of said eighty

five-acre tract to Dupont Street; thence easterly along Dupont Street to Jackson Avenue; thence northerly along Jackson Avenue to the shore of Burrard Inlet; thence westerly along the northerly boundary of said city to the place of beginning; to take the following precautions against fire.

2. All parties building houses or other structures within said limits shall, before commencing the erection of such houses or other buildings, remove all rotten wood and decayed vegetable matter from the piece of land upon which the same are to be built, by carting the same away to some place outside of said limits or by digging or turning up the sub-soil on said portion of land, so as to present a non-inflammable surface of earth; said buildings shall have the foundations built upon the ground or stone foundations, or if placed upon blocks or posts the space between the sills and the ground shall be boarded up the siding of said building and shall be banked with earth, so as to prevent a running fire from getting beneath such building.

3. Whenever such house or other building is about to be erected it shall be the duty of the person about to build the same to notify one of the Fire Wardens hereinafter mentioned, who shall immediately inspect the ground to see that the provisions of this By-Law, regarding the clearing of the lot on which the building is to be erected, have been carried out.

4. He shall also inspect the adjoining lots within a distance of one hundred feet from the site of the proposed building; and if, in his judgment, the lands inspected are in such a condition, owing to the presence of stumps, logs, rotten wood, vegetable matter, rubbish, or other inflammable material, as to endanger the proposed building, then he shall notify the owners of such lots to remove, in manner above mentioned, all rotten wood and decayed vegetable matter, or turn up the soil so as to present a non-inflammable surface for that distance from said lands upon which such building is to be erected.

5. If upon inspection of said lands the Chief Fire Warden shall be of the opinion that the stumps, logs, or such rotten wood, decayed vegetable matter, or other inflammable material may be safely burnt, he shall give to the person building, or to the owner or occupant of such adjoining lands, to the distance of one hundred feet as aforesaid, permission in writing to burn same, providing in said permission precautions be used by such persons, either by keeping a watch during such burning or otherwise, to prevent said fire from spreading, and such precautions shall be followed strictly, and in case of their non-observance the party making default shall be subject to the penalties of this By-Law.

6. The owners of all houses or other buildings erected before the passing of this By-Law shall, within ten days after the passing of same, cause all timber, stumps, mould, decayed vegetable matter, and all other inflammable material to be removed off the lands used or occupied by them in connection with such buildings; and if upon inspection, as in the last preceding section, by the Chief Fire Warden, and upon the like permission as in the said section is set out, and upon observing the precautions mentioned therein and subject to the like penalties, the said timber, stumps, decayed vegetable matter, and other inflammable material may be removed by fire and turn up the sub-soil so as to present a non-inflammable surface of earth; and if the foundation of such buildings are not resting upon the soil but resting upon posts or blocks, then the space between the sills and the ground shall be boarded up and banked with earth, so as to prevent running fires from getting beneath said building.

7. The Chief of Police and all constables and peace officers within the City of Vancouver shall be Fire Wardens to see that the provisions of this By-Law are complied with, and are hereby authorized to enter in and upon any house or lot within the said limits at all reasonable hours, to see that all the requirements of this By-law are strictly obeyed.

8. In case of fire or imminent danger of fire, it shall be the duty of every able-bodied male inhabitant within the city, at the request of the Chief of Police or any officer of the Fire Brigade, or any police constable, to assist to the utmost of his power the said Chief of Police or other officer or police constable, or the head of the Volunteer Fire Department, or to the Mayor or Aldermen of the city, in preventing or suppressing such fire.

9. It shall be the duty of the Fire Wardens, at least once a month, to inspect all yards and premises contiguous to dwellings, and all chimneys, flues, fireplaces, stoves, ovens, boilers, or other apparatus which

may be dangerous to convey or promote fire; and to order the owners or tenants thereof, whenever in their judgment they may think it advisable, to remove all shavings, rubbish, or other inflammable material therefrom.

10. Every chimney or flue built or constructed within the city shall be built of brick, stone, or other incombustible material, and the walls thereof shall be not less than four inches in thickness, exclusive of plastering; and every such chimney shall rise at least three feet above ridge of the house or building in which the same shall be, and every such chimney or flue, if built in circular form, shall be not less than twelve inches in diameter, and if oval form not less than nine inches by sixteen; and all timber upon which a chimney or flue rests shall be at least eight inches below the base of said flue or chimney; and every such chimney or flue shall be so constructed as to admit of its being scraped, brushed, or cleaned.

11. No person shall build or construct within the city any chimney or flue otherwise than in accordance with the provisions of the next preceding section of this By-Law, and no person shall use within the city any chimney or flue constructed or built otherwise than in accordance with such provisions.

12. No timber shall be laid within two feet of the inside of any oven, copper still, boiler or furnace.

13. The pipe of every stove, chimney, or fireplace within the city, shall be conducted into a chimney of stone, brick or other incombustible material, and in all cases where a stove-pipe passes through the woodwork of a building within the city, it shall be separated from such woodwork at least three inches by metal or other incombustible material, and all pipes from stoves, ovens or furnaces, over fifteen feet in length, shall be riveted at each joint, and when necessary, for safety, supported and stayed by wires, and no person shall use within the city any pipe or stove-pipe which is not put up in accordance with the provisions of this section.

14. 15. The occupant or other person in charge of any house or building within the city, or of any room or place therein, where a stove is used shall have, place and keep under such stove a hearth or pan of brick, or metal or other incombustible material, and the bottom of such stove shall not be less than six inches from such hearth or pan, and the sides or ends thereof, not less than eighteen inches from any wooden partition or other woodwork, and the pipes of such stove shall not be placed within twelve inches of the ceiling of or of any wooden wall or partition, and where any such stove is used to heat more than one room or place, by being built into any wall or partition, the space around it on the top and sides to the distance of at least nine inches, shall be filled with bricks and mortar, stone, sheet-iron, or other incombustible material.

16. No person shall, within the city, place, keep, or deposit ashes in wood receptacles or within twenty-five feet of a house or building, unless the same are contained in some safe depository constructed of brick, stone, or other incombustible material.
